

ABS Airbag Packing/Folding Procedure – ESCAPE Models (15 & 30L)

1. Fully deflated airbag, release button is under orange tab

2. Lift flap and press Red button to deflate airbag

3. Fold bottom edge behind airbag towards top of bag

4. Fold top edge under airbag

5. Rear view of airbag with top & bottom edges folded

6. Start to 'concertina' fold from the outside edge

7. Concertina folding in process

8. Fully 'concertina' folded airbag

10. Note position of orange cross and Black/orange release mechanism

Please note the correct positioning of these two items - they must match up with the mesh panel with the orange cross. The airbags must be folded to the correct full internal length of the backpack.

13. Fully folded and packed airbag before final closure of the Velcro cover panel

12. Fully re-packed Escape bag.
